

# ESGWEISE

## IFRS Compliance and Capital Services

*IFRS 9, ECL, ICAAP & Stress Testing.* Enabling Action. Sustaining Outcomes.

[contact@esgweise.com](mailto:contact@esgweise.com)

# About ESG WEISE

ESG Weise Global enables financial institutions to develop and strengthen integrated ECL, ICAAP, and Stress Testing frameworks aligned with Basel III / IV and CBUAE supervisory expectations.

## IFRS 9 ECL Frameworks

Robust model design and provisioning accuracy

## ICAAP Governance

Comprehensive capital adequacy planning

## Stress Testing

Forward-looking risk and capital resilience

## Validation & Documentation

Audit-ready and regulator-compliant systems

# Why IFRS Compliance & Capital Services ?

# Solution Architecture

## Integrated Capital Risk Framework

ECL → ICAAP → Stress Testing →  
Governance → Validation

Each pillar feeds into the next:

ECL models generate risk inputs (PD, LGD, EAD).

ICAAP consolidates risk-weighted capital adequacy.

Stress Testing validates resilience under macroeconomic shocks.

Governance ensures Board oversight and regulatory traceability.

# ECL Framework Development

## IFRS 9 Expected Credit Loss Solutions

## Scope of Work

### Component

#### PD, LGD & EAD Modelling

Statistical / expert-based models calibrated to Portfolio and rating migration.

#### ECL Policy & Methodology

Definition of provisioning logic, staging, and write-off thresholds.

#### Macroeconomic Overlay

Integration of forward-looking variables and scenario weightings.

#### Segmentation & Staging Logic

Differentiation by asset class, credit quality, and behavioral patterns.

#### Governance & Validation

Model governance, approval process, backtesting, and periodic validation.

# ICAAP Framework Development

## Internal Capital Adequacy Assessment Process

| Component                                 | Scope of Work                                                                              |
|-------------------------------------------|--------------------------------------------------------------------------------------------|
| Risk Identification & Materiality Mapping | Quantification of Pillar II risks - liquidity, IRRBB, concentration, reputation, strategy. |
| Capital Adequacy Methodology              | Economic capital computation, buffer design, and stress integration.                       |
| Governance & Documentation                | Policy design, internal oversight, and Board approval alignment.                           |
| Capital Planning Integration              | Linkage with strategic planning, profitability, and risk appetite.                         |
| SREP & Supervisory Readiness              | Template preparation, narrative documentation, and regulator engagement.                   |

# Objective and Deliverables for ICAAP Project

# Stress Testing Framework

## Scenario Design & Resilience Testing

### Scenario Development

Design of baseline, adverse, and extreme scenarios across key macroeconomic indicators.

### Sensitivity Analysis

One-variable shock tests for market, credit, and liquidity risk drivers.

### Reverse Stress Testing

Identification of conditions that lead to capital breach events.

### Portfolio Impact Simulation

Assessing changes in capital ratios, profitability, and liquidity buffers.

### Governance & Reporting

Reporting framework with Board-approved escalation protocols.

# Objective and Deliverables for Stress Testing Project

# Validation & Governance Framework

---

## Area

Model Validation  
Documentation & Traceability  
Governance & Control

## Key Deliverables

**Model Validation:** Independent quantitative review, backtesting, benchmarking, and challenger model creation.

**Documentation & Traceability:** End-to-end methodological paper, data lineage, and assumptions log.

**Governance & Control:** Model Risk Policy, periodic review mechanism, and Board oversight templates.

# Commitment to Excellence: Our Framework for Project Success and Implementation

-> With a responsive and flexible problem-solving structure, we swiftly deliver effective solutions, adeptly navigating the dynamic business landscape

Adaptive Methodologies

Rapid Decision-Making

Strategic Agility

Client-Centric Agility

We cultivate collaboration through diverse mechanisms on a regular basis

Pre-alignment  
Discussions

Targeted  
Trainings and  
Workshops

Regular  
Check-ins

Communications  
via Shared  
Platform

Proactive  
Progress  
Updates and  
Risk Mitigation

Dedicated  
Feedback  
Mechanisms

*"Years of experience have sharpened our responsiveness and agility in assisting clients at every stage, from startups to established firms, across advisory, strategy to implementation"*

Our forward-thinking approach ensures that your business stays ahead, embracing cutting-edge solutions for sustainable success <-

Our forward-thinking approach is evident in our 100% project success rate, highlighting the sustainability of our solutions.

Client  
Testimonials

"A consistently fantastic experience with ESGWEISE – always a pleasure to work with!"

"Commendable effort! The team at ESGWEISE is not only reliable but also highly available."

"Impressive grasp of an unknown industry, coupled with analytical and logical strategic thinking."

"From proposal to perfected business plan, ESGWEISE exemplifies professional ethics and dedication to refining and raising funds."

Regulatory Expertise

Forward-Thinking Strategies

Proactive Adaptation

Futuristic Problem-Solving

The background features a complex, abstract graphic in shades of blue and white. It includes a network of interconnected nodes and lines, a large gear-like shape, and several arrows pointing in different directions, suggesting a process or system. The overall aesthetic is modern and technological.

# Reference Projects ECL

## Bahrain Based Fintech

IFRS 9 ECL Model Development, Policy governance documentation, Audit support and CB query resolution

## Small Sized Bank in Bahrain

Develop PD, LGD, EAD and ECL models for Retail, Corporate and Investment portfolio, and Automate the entire ECL calculations process.

## IFRS 9 Model Review

Review of IFRS 9 models developed for personal loans and SME portfolios considering the requirements under IFRS 9

## IFRS 9 Model Validation

Validate the existing IFRS 9 models involving quantitative and qualitative validation

## IFRS 9 Model Revamp

Enhance the Bank's IFRS 9 model suite by improving accuracy, robustness, and regulatory alignment across all components.

## IFRS 9 Model Validation

Validate its existing IFRS 9 models involving quantitative and qualitative validation for an NBFC.

# Reference Projects ICAAP & ST

## ICAAP Review and Enhancement

Review and enhancement of existing ICAAP framework to align with revised Basel III and local regulatory requirements

## ICAAP Framework Implementation

Development of ICAAP framework including identification of material risks, risk appetite linkage, capital adequacy assessment and governance structure.

## Pillar II Risk Identification and Quantification

Developed quantification methodology for Pillar II risks including concentration, IRRBB, and strategic risk.

## Scenario Design and Model Integration

Developed macroeconomic and idiosyncratic scenarios for bank-wide stress testing, integrating results into ICAAP and Recovery Plan.

## Enterprise-wide Stress Testing Framework

Design and implementation of stress testing framework covering credit, market, liquidity, and operational risks.

## Credit Portfolio Stress Testing Implementation

Developed credit stress testing model to assess impact on PD/LGD, staging, and capital requirements under various downturn scenarios

# Reference Projects – Others

## IFRS 16 Treatment

Inclusion of the PPE and Lease end of life expenses in the calculations and provisioning.

## Assurance of Sustainability Linked Loan

Providing Assurance on the sustainability linked loan.

## Training Financial Institution

Internal Training and Capacity Building on ICAAP , Capital Risk, Provisioning.
